DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species: Applicant must elect one specie from each category.

Category #1: Cargo elements

Specie A: the cargo elements include one or more therapeutic agents (claim 30)

Specie B: the cargo elements include one or more diagnostic agents (claim 31)

Specie C: the cargo elements include one or more sensor agents (claim 32)

Specie D: the cargo elements include one or more prosthetic agents (claim 33)

Generic to Category #1: Claims 1-29 and 34-64

Justification: Each cargo element includes a separate type of agent. The species are thus mutually exclusive.

Category #2: Processing elements

Specie E: the electromagnetic radiation has a frequency in the UHF region. (claim 39)

Specie F: the electromagnetic radiation has a frequency in the microwave region (claim 40)

Specie G: the electromagnetic radiation has a frequency in the radio region. (claim 41)

Generic to #2: Claims 1-38 and 42-64

Art Unit: 1631

Justification: Each electromagnetic region has its own unique type of frequency. The different regions of the spectra are defined in a way to make these regions mutually exclusive and distinct.

Category #3: logic states of the qubit

Specie H: The logical states of the qubit are defined by electron spin polarization (claim 42)

Specie I: The logical states of the qubit are defined by nucleus spin polarization (claim 43)

Specie J: The logical states of the qubit are defined by relative to an energy difference (claim 44)

Generic to #3: claims 1-41, and 45-64

Justification: Each definition of the logical states of a qubit is mutually exclusive in terms of types of spin polarizations and energy differences. The claims are thus, mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 1631

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

Art Unit: 1631

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the central PTO Fax Center. The faxing of such pages must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993)(See 37 CFR § 1.6(d)). The Central PTO Fax Center Number is (571) 273-8300.
